Table of contents

Chapter 1	
Introduction	9
Part 1	
The bilirubin/albumin ratio in the management of hyperbilirubinemia in preterm infants	17
Chapter 2	
Kernicterus, bilirubin induced neurological dysfunction and new treatments for unconjugated hyperbilirubinemia	19
<i>G. Buonocore et al. (eds.), Neonatology. A Practical Approach to Neonatal Diseases. Springer-Verlag Italia 2011. Ch83:621-628</i>	
Chapter 3	
Usefulness of the bilirubin/albumin ratio for predicting bilirubin-induced neurotoxicity in premature infants	37
<i>Archives of Disease in Childhood Fetal & Neonatal Edition 2008;93:F384–F388</i>	
Chapter 4	
A double-blind, randomized controlled trial on the bilirubin/albumin ratio in jaundiced preterm infants	53
<i>Submitted</i>	
Part 2	
Recommendations for the management of hyperbilirubinemia in preterm infants	75
Chapter 5	
Transcutaneous bilirubin measurements in preterm infants: Effects of phototherapy and treatment thresholds	77
<i>Submitted</i>	

Chapter 6	
Uniform treatment thresholds for hyperbilirubinemia in preterm infants: background and synopsis of a national guideline	97
<i>Early Human Development 2011;87:521-5</i>	
Chapter 7	
High variability and low irradiance of phototherapy devices in Dutch NICUs	113
<i>Arch Dis Child Fetal Neonatal Ed. 2012 May 18. (Epub ahead of print)</i>	
Chapter 8	
Measurements of neonatal bilirubin and albumin concentrations: a need for improvement and quality control	129
<i>European Journal of Pediatrics. 2011;170:977-82.</i>	
Chapter 9	
General discussion	141
Summary	161
Nederlandse samenvatting	165
Dankwoord	169
About the author	173
List of publications	175
